Description of Room 16C28

Room 16C28 is a 7-workstation computer laboratory in the School of Computing and Mathematics.

Room 16C28 offers mainly classroom accommodation with 6 workstations for break-out activities.

There is a single entrance door from the corridor and two sets of adjoining doors that allow Room 16C28 to be amalgamated with Room 16C29 to form a classroom alongside a 31 computer workstation lab.

For the lecturer/teacher/demonstrator there is one workstation and projector at the front of Room 16C28.

The 6 student/learner workstations are organized on one side of Room 16C28.

The workstations in Room 16C28 use Windows 7
