Room 16G26 is a 60-workstation laboratory in the School of Computing and Mathematics at Jordanstown.

There are two single-door entrances from the corridor, one at each end of the lab.

Lecturer/teacher/demonstrator has projection from workstation Number 52 to one end of the room.

The remote control for data projection and the radio microphone are available from Room 16G24.

The layout of 16G26 is 60 workstations in 7 eight-seater clusters and 1 four-seater cluster.

The workstations in Room 16G26 use Windows 8.1
